

# Better homes. Better living.

Discover the keys to a healthy, comfortable and efficient home.

A certified ecoSelect™ home is designed and built to be healthy, comfortable and efficient through a combination of green building strategies, water conservation features and performance testing.

In addition, a certified ecoSelect™ home is inspected and energy rated by a certified third party organization, giving you clear expectations of what your utility bill will be before ever stepping foot in your new home.

For more information, visit ecoSelect™ online at [buildecoSelect.com](http://buildecoSelect.com)

## Performance Label

ADDRESS: <sup>1</sup>  
ASSESSMENT DATE: <sup>2</sup> | HOUSE SIZE: <sup>3</sup>

### THIS HOME FEATURES: <sup>4</sup>

[EXAMPLE ITEMS]

- Third-party inspections and performance testing
- High efficiency heating & cooling system(s)
- Energy efficient lighting and fixture
- Programmable thermostats
- EP A WaterSense® fixtures
- Low-E windows
- Radiant barrier

RATING ID: <sup>5</sup>

### ESTIMATED MONTHLY ENERGY COSTS <sup>6</sup>

\$ **68** \*

\*heating and cooling costs only

HERS® INDEX **72** <sup>8</sup>

The Home Energy Rating System (HERS) Index is a nationally recognized system for assessing a home's energy performance ([resnet.us](http://resnet.us)). A new home built to the 2006 IECC scores a 100. One point in either direction indicates the home is either 1% more or less efficient than the 2006 IECC reference design home. A lower score indicates a more energy efficient home, resulting in lower energy bills.

\*This sticker is intended for comparison purposes only. Actual energy savings and energy use is dependent upon occupant(s). Estimates are based on modeling from Architectural Energy Corporation's REM/Rate software. ecoSelect Certifications, LLC©

After completing the certification process, your home receives an ecoSelect™ Performance Label and rating report with information on energy costs, efficiency features and the HERS rating.

- 1 Home address
- 2 Final assessment date
- 3 Conditioned square footage
- 4 Energy efficiency features
- 5 Individual ecoselect™ Rating ID number
- 6 Average estimated monthly heating and cooling costs
- 7 The HERS (Home Energy Rating System) Index
- 8 HERS Index Score
- 9 Builder's logo or name

### QUALITY ASSURED

inspected and verified by a third party to verify program compliance

### HIGH PERFORMANCE BUILDING ENVELOPE

help keep heat in during the winter and out during the summer

### PROGRAMMABLE THERMOSTATS

allow for better control of the indoor environment of your home

### HIGH PERFORMANCE HVAC

properly installed HVAC systems use less energy, run quieter, and help reduce indoor humidity and increase comfort

### ADVANCED AIR SEALING

increases home performance and improves comfort and health by eliminating unwanted drafts

### WATER EFFICIENCY

by using high efficiency WaterSense® labeled water fixtures that decrease water use and increase savings on water bills

### ENERGY EFFICIENT LIGHTING

offers savings by using less energy and lasting longer than conventional light-bulbs
